Unity of Invention

35 U.S.C. § 371

1. This application was filed under 35 U.S.C. § 371 and is subject to unity of invention practice pursuant to 35 U.S.C. § 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive  
5 concept under PCT Rule 13.1. In accordance with 37 C.F.R. § 1.499, applicant(s) is/are required, in response to this action, to elect a single invention to which the claims must be restricted.

10 a. Group I, claim(s) 35-54, drawn to **nucleic acids** encoding a flavivirus antigen.

b. Group II, claim(s) 55-64, drawn to a **method of immunizing** a host against flavivirus infection.

15 c. Group III, claim(s) 65, drawn to flavivirus **antigen**.

d. Group IV, claim(s) 66 and 67, drawn to **methods of detecting** flaviviral infections.

20 The inventions listed as Groups I-IV do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. The claimed invention ~~fails to make a contribution over the prior~~  
25 art (i.e., see the ISA Chapter I search report). As set forth in the search report, the prior art provides various expression constructs encoding flaviviral antigens. Thus, there the presence of a special technical feature is clearly absent.

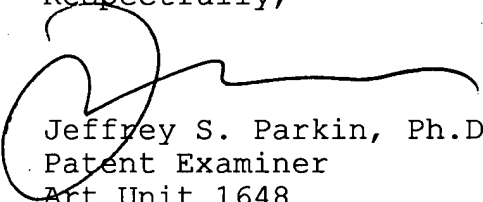

2. Applicant is advised that the response to this requirement to be  
30 complete must include an election of the invention to be examined even though the requirement be traversed.
